

SARACHUPA (GUAMOTE)

HYGIENE PROJECT

COMPLETED
AUGUST 2012

The 44 children and two teachers at this small school, located in Sarachupa, Guamote, suffered from a lack of basic hygienic services. With representatives from the local government, as well as from the bilingual education program, MEDLIFE took charge of constructing this bathroom project. Both parents and community members thanked MEDLIFE's contribution toward the health of their children.
