

ACHULLAY (GUAMOTE)

HYGIENE PROJECT

COMPLETED
JULY 2012

Siblings Daniel and Cynthia Delgado live in Riobamba, Ecuador in the community of Guamote. Along with the other 51 students and three teachers at Escuela Pedro Saye, they used to go into the grassy fields behind the school to relieve themselves, due to the fact that there were no hygienic services available for them to use. The bathrooms built by MEDLIFE Mobile Clinic participants, alongside community members, will help improve hygiene and allow the school's children to live healthier lives.
