

PALMIRA (GUAMOTE)

HYGIENE PROJECT

COMPLETED
MARCH 2011

Students and teachers at 27 de Febrero School in the community of Palmira in Riobamba, Ecuador are now benefitting from new bathrooms, classrooms and a better education due to a MEDLIFE Hygiene Project that was completed in May of 2011. Prior to the construction of new bathrooms, students only had access to an uncovered area with two toilets located in between trees near the school. Students would have to go accompanied by a teacher and have them hold a blanket in front of them for privacy.
